

Marketing your old hardware profitably and securely?

Not an easy task for you.
But we provide a three-in-one solution!

TAKING AWAY OLD HARDWARE

Our concept meets you at your desk

We coordinate operative tasks that are each implemented by one of the three cooperation partners.

From exchanging the devices (DHL Solutions), to deleting data (blanco), re-installation (omnico), all the way to dispensing with the old devices (DHL Solutions). We deliver your new computers freight prepaid to their new destination.

We install and dismantle simultaneously. You save costs and organisational effort. And all tasks will be performed in accordance with all legal requirements, for your security. For optimum economic efficiency.

Use our PC Roll out: We pack devices in protected cartons, apply trackline numbers, seal the cartons and transport them in special containers.

**Perfect logistics and safe transport are our business.
Worldwide. For many years.**

ELIMINATING SENSITIVE DATA

We will extinguish your past – 100 percent secure

When computers are passed on one has to be aware that pure formatting is not enough to delete data from hard disks. These data can be reproduced, and this may result in massive damage. By overwriting the hard disk our quality software deletes 100% of your data – in line with international standards and those

of the US Department of Defence. Without damaging the hard disk. Any form of data reproduction becomes impossible.

This way, Blancco provides the most efficient insurance against data misuse when computers leave your company. And you can concentrate on the present.

blancco
data cleaner

Companies. Banks. Insurers. Ministries.
We eliminate sensitive data. Safely.

RECYCLING USABLE COMPUTERS

Your old hardware has a new, meaningful future

What is no longer of use at your company can be used at other places in a meaningful way that may be profitable to you. We therefore clean, test and market your hardware after deleting all data. And you can choose whether this is carried out on a commission basis in your name or completely at our

own risk. We have top international connections, ensuring capital recovery to you.

On request we alternatively handle the sale to your employees or the donation of the hardware in the course of the "Partner der Schulen" [Partner of Schools] programme!

OMNICO

FIRST CHOICE FOR SECOND HAND PC'S!

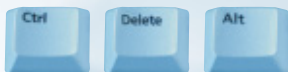

When selling your PCs or giving them away for free: the main thing is you do not have to take care of anything!

COOPERATING WITH STRONG PARTNERS

Ensuring perfect logistics. Securely deleting data. Recycling technology.

Our individual remarketing concept makes sense in economic and ecologic terms. Here, professionals work hand in hand. This teamwork also provides benefits for your company:

- One contact for all tasks
 - Significant time and cost savings
 - 100% data privacy
-
- Maximum room for decisions
 - Active contribution to environmental protection
 - Meticulous documentation for each part
-
- Attractive revenues and positive image through widespread commitment
-
- Maximum confidentiality ensured by employees who are contractually obliged to irrevocably delete each file
-
- Certified and tested in line with ISO 9001

**One team and everything under control.
You can fully concentrate on your new equipment!**

SIMPLE COMMUNICATION

The more complex the task, the more important perfect coordination becomes. Therefore we have one single point of control:

DHL Solutions GmbH
